SUMMARY

Analytical and solutions-driven professional with a computer science background and experience in the development, documentation, and delivery of process innovations. Eager to apply my data analysis skills in a dynamic environment. Skilled in SQL, Python, data visualization, Data analytics and Machine Learning. Aspiring to contribute to data-driven decision-making processes and eager to develop further in data analytics.

SKILLS AND STRENGTHS

- **Programming:** Python (NumPy, Pandas, Matplotlib, Scikit-Learn), SQL.
- **Data Visualization:** Microsoft Power BI, Advanced Excel.
- **Machine Learning:** Supervised and Unsupervised Learning, Feature Engineering, Random Forest, Linear Regression.
- **Soft Skills:** Time Management, Team Collaboration, Analytical Problem-Solving, Research.

EDUCATION

B.Tech in Computer Science.

Shreeyash College of Engineering & Technology, Aurangabad | 2020 - 2024

- **Relevant Coursework:** Statistical Modelling, Machine Learning, Advanced Algorithms

12th (Science)

Shree Bappu Saheb Deshmukh Junior College, Jalgaon Jamod | March 2019

- Passed with Distinction

10th

The New Era High School and Junior College, Jalgaon Jamod | March 2017

- Passed with Distinction

PROJECTS

1. Hotel Booking Data Analytics and Visualization Using Power Bi

- Conducted an in-depth analysis of hotel booking data using Microsoft Power Bi.
- Created visualizations to identify trends and patterns in bookings and Cancellations.
- Analyzed data to uncover insights on booking behavior, seasonality, and customer demographics.
- Developed interactive dashboards and charts to facilitate data-driven decision-making.
- **Tools Used:** Microsoft Power Bi, Data Analysis, Data Visualization with interactive dashboard

2. Medical Insurance Cost Prediction | Machine Learning Project

Objective: Developed a predictive model for estimating medical insurance costs using demographic and health data.

Key Responsibilities:

- Conducted data preprocessing, including handling outliers and encoding categorical variables.
- Performed Exploratory Data Analysis (EDA) to identify significant patterns and relationships.
- Engineered features and trained models, including Random Forest Regressor and Linear Regression.
- Achieved high prediction accuracy with the Random Forest model.

Technologies Used: Python, Scikit-Learn, Pandas, NumPy, Jupyter Notebook, Matplotlib, Seaborn.

Github: https://github.com/shubhu111/Medical_Insurance_Cost_Prediction_ML_Project.git

ACHIEVEMENTS

- **Data Analytics and Visualization Engineering Virtual Program** – Accenture North America
Certification : [completion certificate.pdf](#)
 - **Power BI Engineering Virtual Program** – PwC Switzerland
Certification : [completion certificate.pdf](#)
-

PUBLICATION

[Intelligent Vehicle Safety and Monitoring System](#)

International Journal of Research Publication and Reviews, Vol 4, no 12, pp 2057-2062 December 2023

- Co-authored research published in the *International Journal of Research Publication and Reviews* (Dec 2023), focusing on vehicle safety monitoring through sensor data analysis.
-

DECLARATION

Hereby declare that the to the best mentioned information is true of my knowledge.

Shubham Gajanan Tade.
